

Tiny World Terrarium

Let the imaginative play begin! To get started, simply print and carefully cut out around the objects and "fill" your terrarium. Grab an envelope and save your cut pieces for another day!

A terrarium is a clear and non-draining container that holds a small natural environment. Mosses are small plants that grow in clumps in shady and moist locations. Since mosses and ferns love a moist environment, a terrarium serves as a perfect home!

Have fun and tag us at @lakeviewnaturearea with your tiny terrarium!
